## What I'm passionate about

JavaScript and React JS  
Functional Programming  
Responsive Web Design  
Linguistics  
Game Theory  
Artificial Intelligence

## What I've used

### Languages

SQL, c#, java, perl, javascript, html, css

### Frameworks and Tools

react, jest/enzyme, node, express, angular, jQuery, nancy, xUnit,  
WPF, dapper

### Process

git, scrum, agile, gherkin, unit tests and test driven development

## EMPLOYMENT

Mar 2017 - Dec 2017

### TradePMR

Software Engineer

Implemented new features for a modern, mobile-first, responsive web application. Designed and built new react components with modern functional programming and test-driven design techniques. Maintained existing features on new and legacy applications. Drove stories from design to release in a truly full-stack role on a small team in a fast-paced work environment.

SQL, c#, html/css,  
javascript (react, node)

Nov 2013 - Mar 2017

### Sumtotal Systems

Software Engineer

Developed web code with legacy browser support in an agile scrum work environment. Specialized in single sign on service provider application and custom javascript implementations.

SQL, c#, html/css,  
javascript (angular, jQuery)

## EDUCATION

2005-2009

University of Florida

Bachelor of Arts in Classical Studies
